

Observatory for Children and Youth Rights

Information on data system

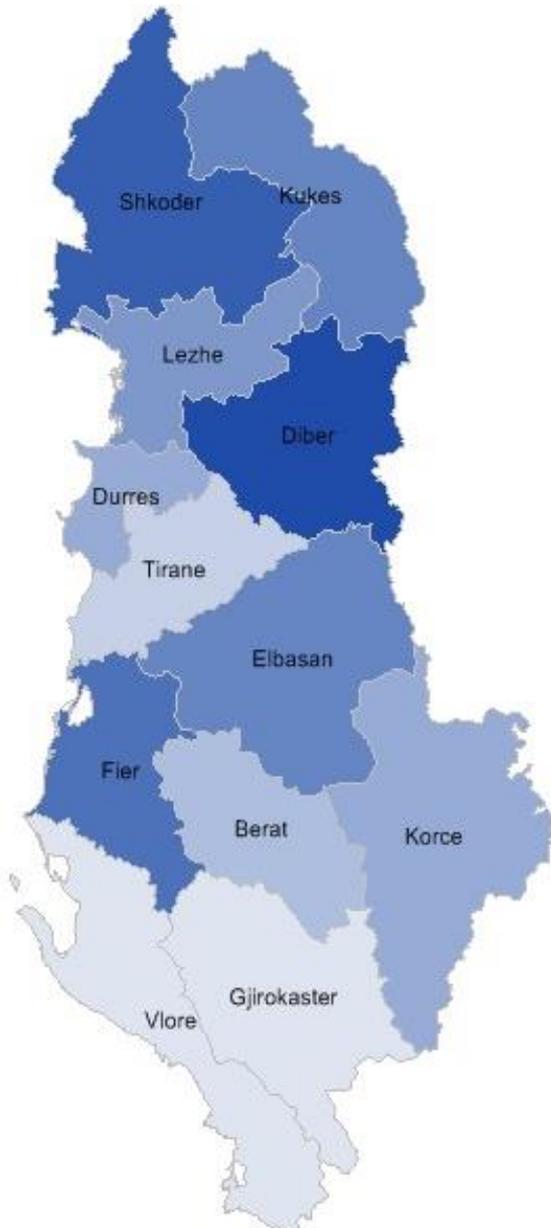

Observatory for Children and Youth Rights in Albania *(2009 – 2018)*

Observatory for Children's Rights experience was introduced for the first time in the Albanian society in 2009, and it aims to function as *a monitoring structure, based on local level*, regarding the implementation and realization of children's rights, by acting and supporting as part of civil society.

In 2018, Observatory's mission was extended by including also youth.

Where are Observatory offices network operating?

Good governance for children must also address the root causes of the lack of public sector responsiveness to children. The place to examine the quality of good governance from a children's perspective is in the points of contact between children and the state.

Issues monitored annually since 2009

- ✓ **Demographic data**
- ✓ **Children's education**
- ✓ **Health care**
- ✓ **Social Protection**
- ✓ **Children with special needs**
- ✓ **Children in conflict with the law**

The data collection and monitoring process is complemented by open discussions, round tables, meetings and seminars with regional and national stakeholders in order to achieve a proper implementation of children's rights

Presentations made by Observatory through the years (2012)

Net enrolment rate in preschool education

The right to education- *pre-school level*

2010

-The regions which continue to have the same situation in year 2010 as in 2009 are Dibra and Shkodra.

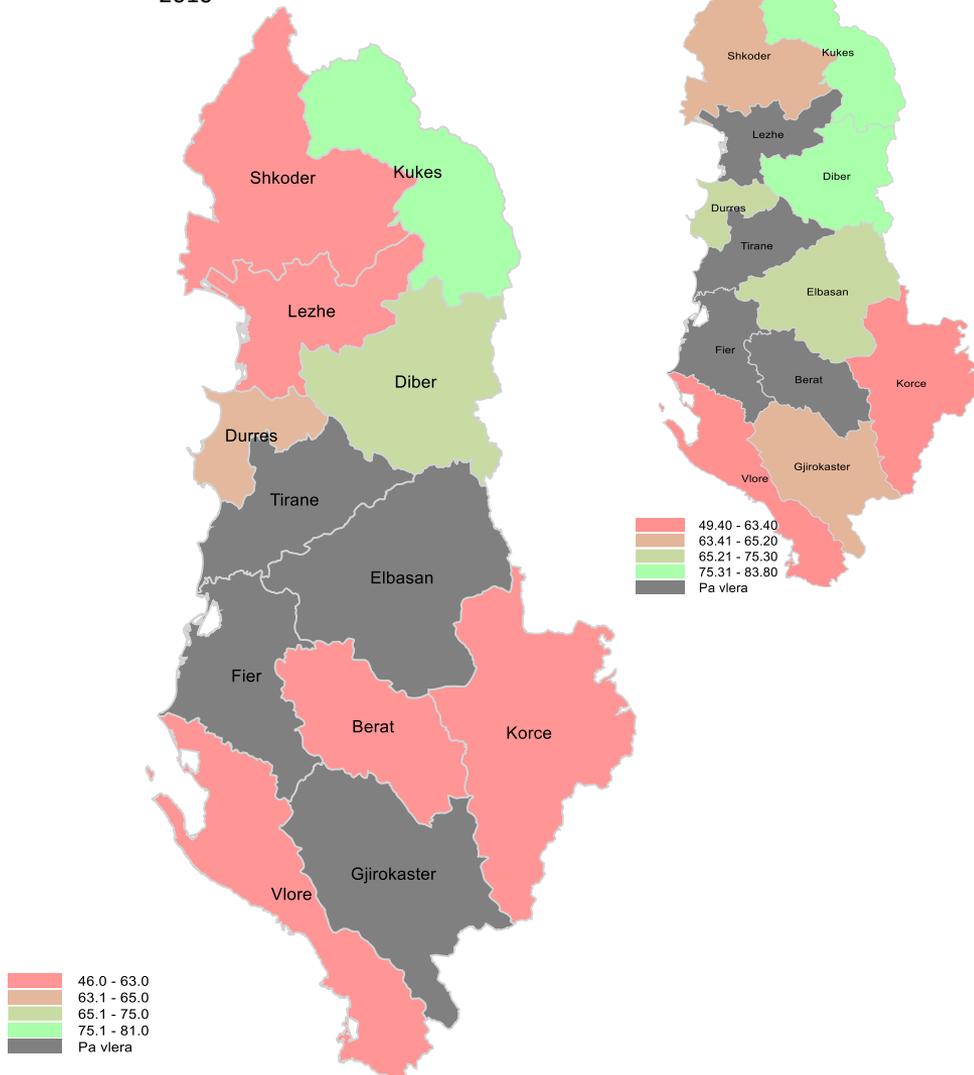

-The regions which have made **progress** in attendance are: Kukës with 9% increase. Korça with 19% and Vlora with 10%.

-In 2010 the regions which have had the greatest attendance of pre-school institutions are Korça and Kukës.

The right to education- *compulsory education*

Net enrolment rate in compulsory education
2010

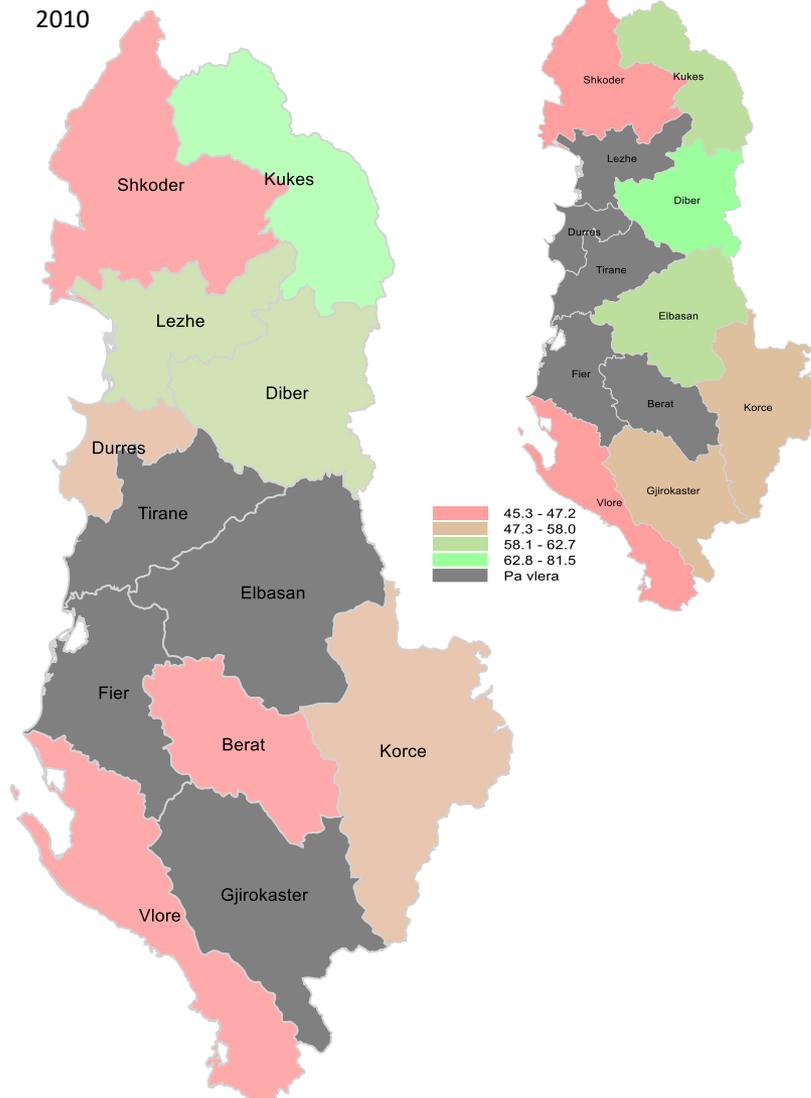

The regions which have had a **decrease** in the attendance rate in compulsory education from 2009 to 2010 are: Dibra(10% decrease), Durrës(3% decrease), Shkodra(6% decrease), Vlora(3% decrease)

In 2010 in compulsory education in higher levels are Dibra and Kukës.

The right to education- secondary education

Net enrolment rate in secondary education

2010

The regions which have a **decrease** in attendance rate in secondary education from 2009 to 2010 are: Kukës (14% decrease), Korçë (11% decrease), Shkodër (9% decrease), (Vlorë 11% decrease).

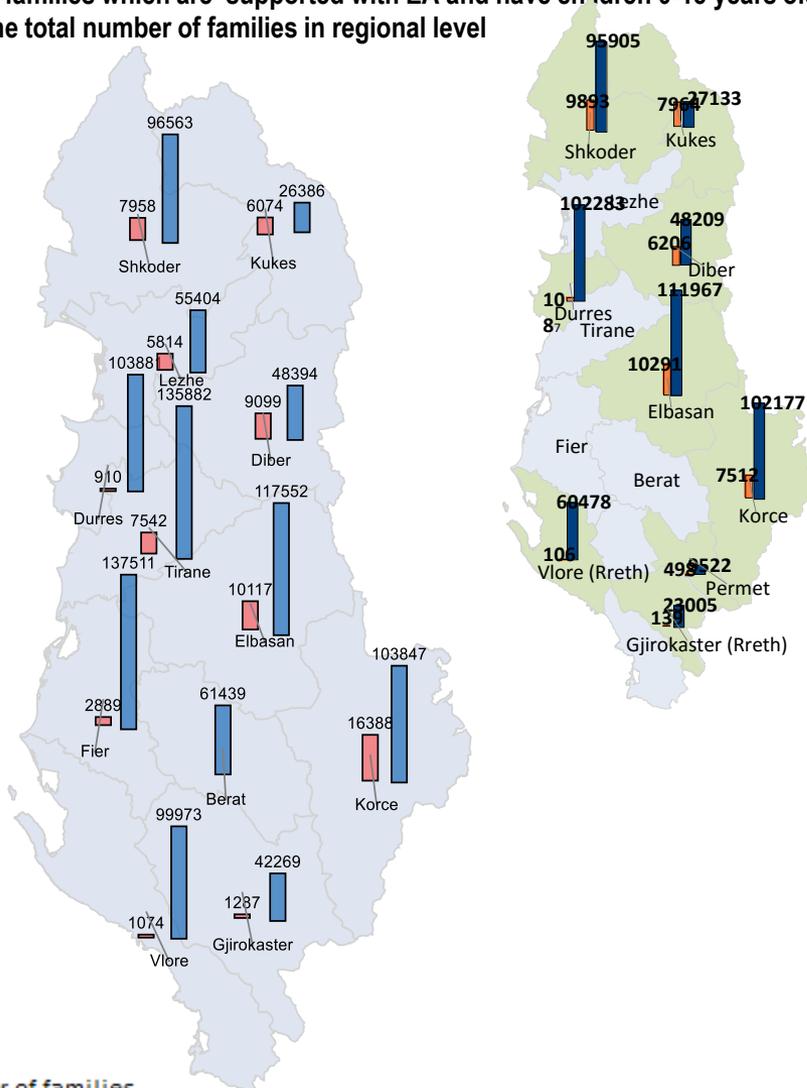

In 2010 the regions which have greater levels of attendance rate in secondary education are Kukës. Dibra and Lezha.

Note: Related to high school attendance in Commune level, for year 2010, there is present the phenomena of changing the school even that the child leave in different area. This phenomena of changing school is reflected in calculation that we made present, which affect in direct way in the result made present and we could not measure the level of change.

Presentations made by Observatory through the years (2011)

The number of families which are supported with EA and have children 0-15 years old compared to the total number of families in regional level

Number, 2010

If we see the ratio between the total number of families in regional level and number of families which are supported with economic aid and have children 0-15 years old, Shkodra, Elbasan, Korca and Lezha are in direct proportion. Kukes and Dibra in 2009 and 2010 are the regions which are in indirect proportion for these two indicators; which means that even though the total number of families is low compared to other regions, the number of families supported by EA is high.

Total number of families

Total number of families supported with EA and have children 0-15 years old

Legend

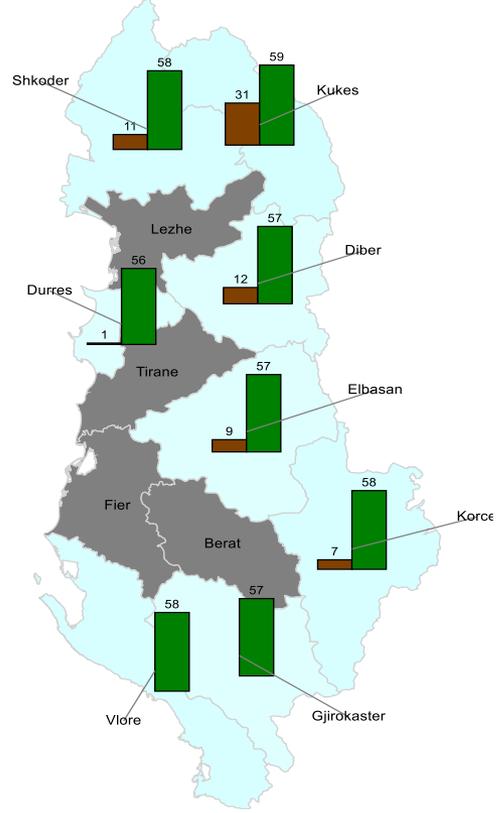

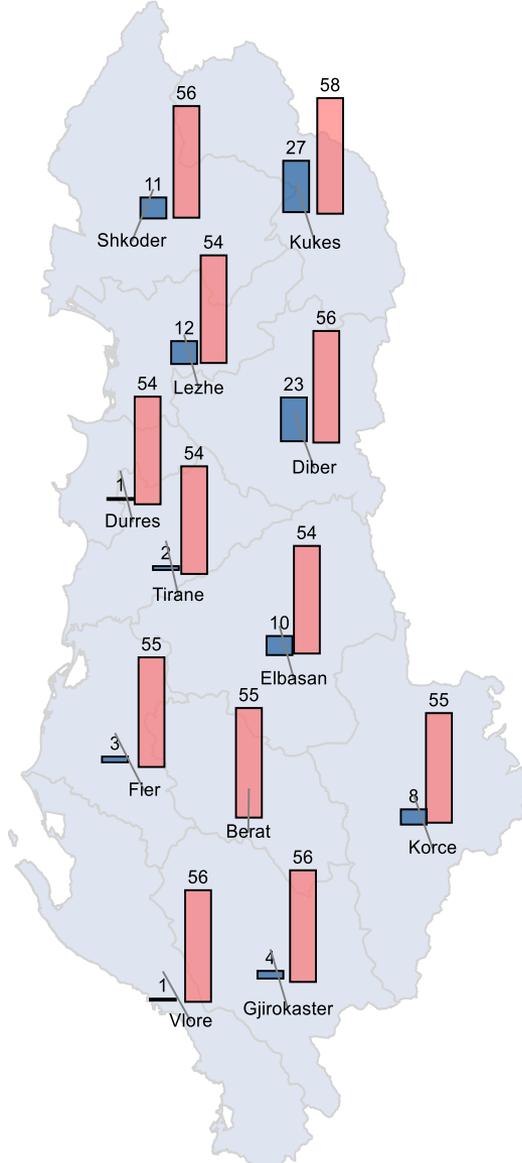

Percentage of children 6-15 years old, 2010

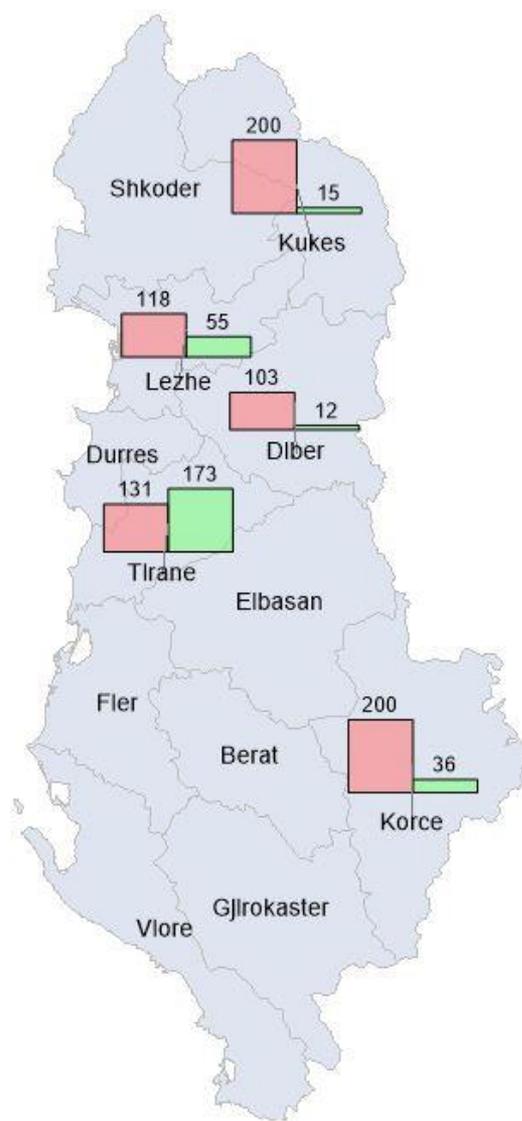

Percentage of children 6-15 years old the families of whom are supported with EA compared to the total number of children, 2010

The ratio of children 6-15 years old is approximately in the same ratios as the total number of children; Kukësi 58%, Shkodër 56%, Durrës 54%, Dibër 56%, Elbasan 54%, Korçë 55%, Gjirokastër 56%, Vlorë 56% etc

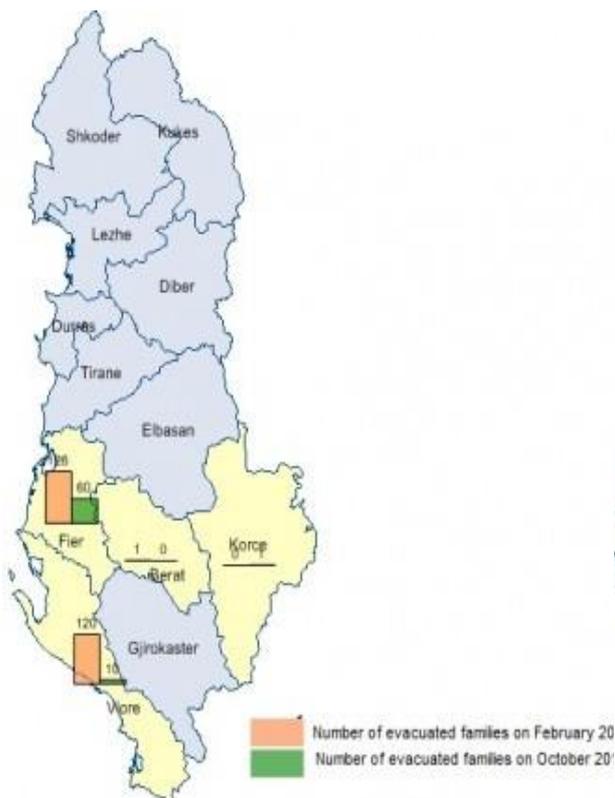

What is the actual situation of the Albanian emigrants? (updated information – December 2015)

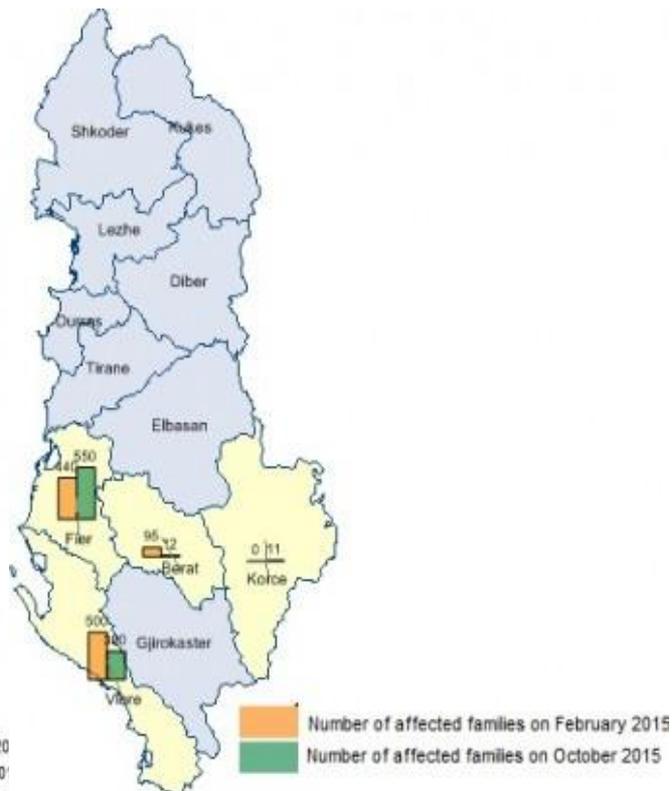

Left the country during 2015

Take away messages

- Use national data from up-down and v.s periodically;
- A local authority responsible to coordinate data collection by cross sectors and report prepared;
- Cross sector indicators has to "speak" the same language regarding indicator for data collection;
- Visualize your data and make them public;

Take away messages

- Link data with political promises and citizens voice;
- Data recording affect on better management in timing - quality of services – needs.
- Please! Do not forget to bring the voice of children throughout of these processes.
